DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 10, 2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-2, 4-5, 7-8, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 10, "the surface" lacks positive antecedent basis. This surface does not appear to be referring back to "a surface" set forth in line 5.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

5. Claims 1-2, 4-5, 7-8, 10, 12-13, and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson, Jr. (US 3,760,673).

Peterson discloses all the recited elements of the invention including:

- a) a rotatable blade having an edge which is non-linear radially (e.g., 18);
- b) a counter-knife having an edge generally conforming to a profile of the blade edge (e.g., 30);
- c) a surface (e.g., at 35);
- d) the blade edge being located along the surface of an imaginary cylinder formed by the rotation of the cutting edge so that the cutting edge of the rotating blade passes the cutting edge of the counter-knife in succession when rotating blade is turned (col. 3, lines 9-19).

Regarding claims 2 and 12, col. 3, lines 9-19. Regarding claims 4 and 7, a portion of the blade edge can first rotate past the counter-knife to cut a portion of the carpet pile adjacent a base of the carpet first and the blade edge has a portion capable of cutting an edge of the carpet with an edge on the counter-knife having a profile conforming the portion of the blade edge. Regarding claim 13, the blade is shaped such that it is capable of cutting portions that are perpendicular and angled relative to the plane of the carpet base. Regarding claims 16-17, the element 30 is movable relative to the element 35 via 36.

Response to Arguments

6. Applicant's arguments filed August 10, 2007 have been fully considered but they are not persuasive.

Applicants contend that there is no disclosure or suggestion in the Peterson reference of a surface that is not co-planar with the counter knife.

The examiner respectfully disagrees. As set forth above, Peterson does disclose a surface that is not co-planar with the counter knife. The examiner respectfully suggests to further defining the invention with limitations reciting structural relationships of elements such as a fence, a trolley, the blade, and the counter knife in relation to a conveying direction of the trolley to overcome the rejections over the Peterson reference set forth in the office action.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.
